1. Zapytanie bez CTE:

```
   SELECT TOP 20 COUNT(*) ctn,
                 p.Name,
                 pc.Name
FROM Sales.SalesOrderDetail sod
         LEFT JOIN Production.Product p
                   ON sod.ProductID = p.ProductID
         LEFT JOIN Production.ProductSubcategory ps ON p.ProductSubcategoryID =
ps.ProductSubcategoryID
         LEFT JOIN Production.ProductCategory pc ON ps.ProductCategoryID =
pc.ProductCategoryID
GROUP BY p.Name, pc.Name
ORDER BY ctn DESC;
```

MemoryGrantInfo	
DesiredMemory	1808
GrantedMemory	1808
GrantWaitTime	0
IsMemoryGrantFeedbackAdjusted	ateGrant
LastRequestedMemory	1808
MaxQueryMemory	965176
MaxUsedMemory	376
RequestedMemory	1808
RequiredMemory	1536
SerialDesiredMemory	1808
SerialRequiredMemory	1536

Max memory used: 376 [KB]

2. Zadanie z CTE:

```
WITH topsales AS (SELECT TOP 20 COUNT(*) ctn, ProductID
                  FROM Sales.SalesOrderDetail sod
                  GROUP BY sod.ProductID
                  ORDER BY ctn DESC)
SELECT ts.ctn,
              p.Name,
              pc.Name
FROM topsales ts
         LEFT JOIN Production.Product p
                   ON ts.ProductID = p.ProductID
         LEFT JOIN OLTP.Production.ProductSubcategory ps ON
p.ProductSubcategoryID = ps.ProductSubcategoryID
         LEFT JOIN Production.ProductCategory pc ON ps.ProductCategoryID =
pc.ProductCategoryID;
```

MemoryGrantInfo	
DesiredMemory	24
GrantedMemory	1024
GrantWaitTime	0
IsMemoryGrantFeedback	NoAccurateGrant
LastRequestedMemory	1024
MaxQueryMemory	970848
MaxUsedMemory	16
RequestedMemory	1024
RequiredMemory	16
SerialDesiredMemory	24
SerialRequiredMemory	16

Max memory used: 16 [KB]

Użycie pamięci jest mniejsze w zapytaniu z CTE o 360 [KB] mniejsze niż bez CTE.
